Inspect your bash history and use *history expansion* to re-run a command from it.

```
┌──(kali⊛kali)-[~/OSCP_Training]
└─$ history 3
    1
    2  passwd
    3  clear

┌──(kali⊛kali)-[~/OSCP_Training]
└─$ !2

┌──(kali⊛kali)-[~/OSCP_Training]
└─$ passwd
Changing password for kali.
Current password: █
```

Execute different commands of your choice and experiment browsing the history through the shortcuts as well as the *reverse-i-search* facility.

```
┌──(kali⊛kali)-[~/OSCP_Training]
└─$ !521
```

```
┌──(kali⊛kali)-[~/OSCP_Training]
└─$ !!
```

```
┌──(kali⊛kali)-[~/OSCP_Training]
└─$ clear
bck-i-search: clear_
```
